

TOOLS FOR ACTION-

From theory and experience to practical quality instruments

Berlin, 26-27 January 2016

Viveca.Urwitz@comhem.se

Quality Action
Improving **HIV** Prevention in Europe

Viveca Urwitz, WP4

This work is part of the Joint Action on Improving Quality in HIV Prevention (Quality Action), which has received funding from the European Union within the framework of the Health Programme.

What are the tools ?

The compiled evidence
of
Good Practice

Criteria for selecting existing tools or similar instruments

- The tool should have been evaluated. There should be documentation proving the tool works.
- The tool should have been demonstrated to be suitable for HIV Health Promotion and Prevention. It should be possible to integrate key concepts from the international response.
- The tool should be practical and possible to make user-friendly to ensure good participation.

Existing tools adapted and applied

- **Succeed**

Straight forward, versatile questionnaire with a self-diagnostic approach. Ambition levels can be adapted.

- **QIP** (Quality in Prevention)

Comprehensive and extensive web-based questionnaire. Assessment based on defined scoring. Possibility for external scoring and written advice.

- **PQD** (Participatory Quality Development)

A toolbox of participatory methodologies to help develop your intervention.

New tools developed and tested

- **PIQA** (People who inject drugs + Quality Assurance)
Questionnaire and scoring card for self assessment and quality assurance. Adapted to the challenges of prevention of Hiv and Hepatitis for PWID.
- **Shift** (QI Programme Tool)
Strategic approach to assessing and prioritising national and sub-national prevention programmes. Uses and feeds into other data collection and analysis efforts (e.g. Dublin reporting).

Tools consist of:

- The tool itself; web-based or in interactive, user friendly PDF. You can download and fill in and save/edit.
- Extra print-out version for Succeed
- User guides for all tools
- Scoring guide (when applicable)
- Background information
- Case studies for Succeed and PQD
- PPT for presentation or training purposes

Checklist for, and overview of, each tool

General translation guidelines and a facilitation guide !

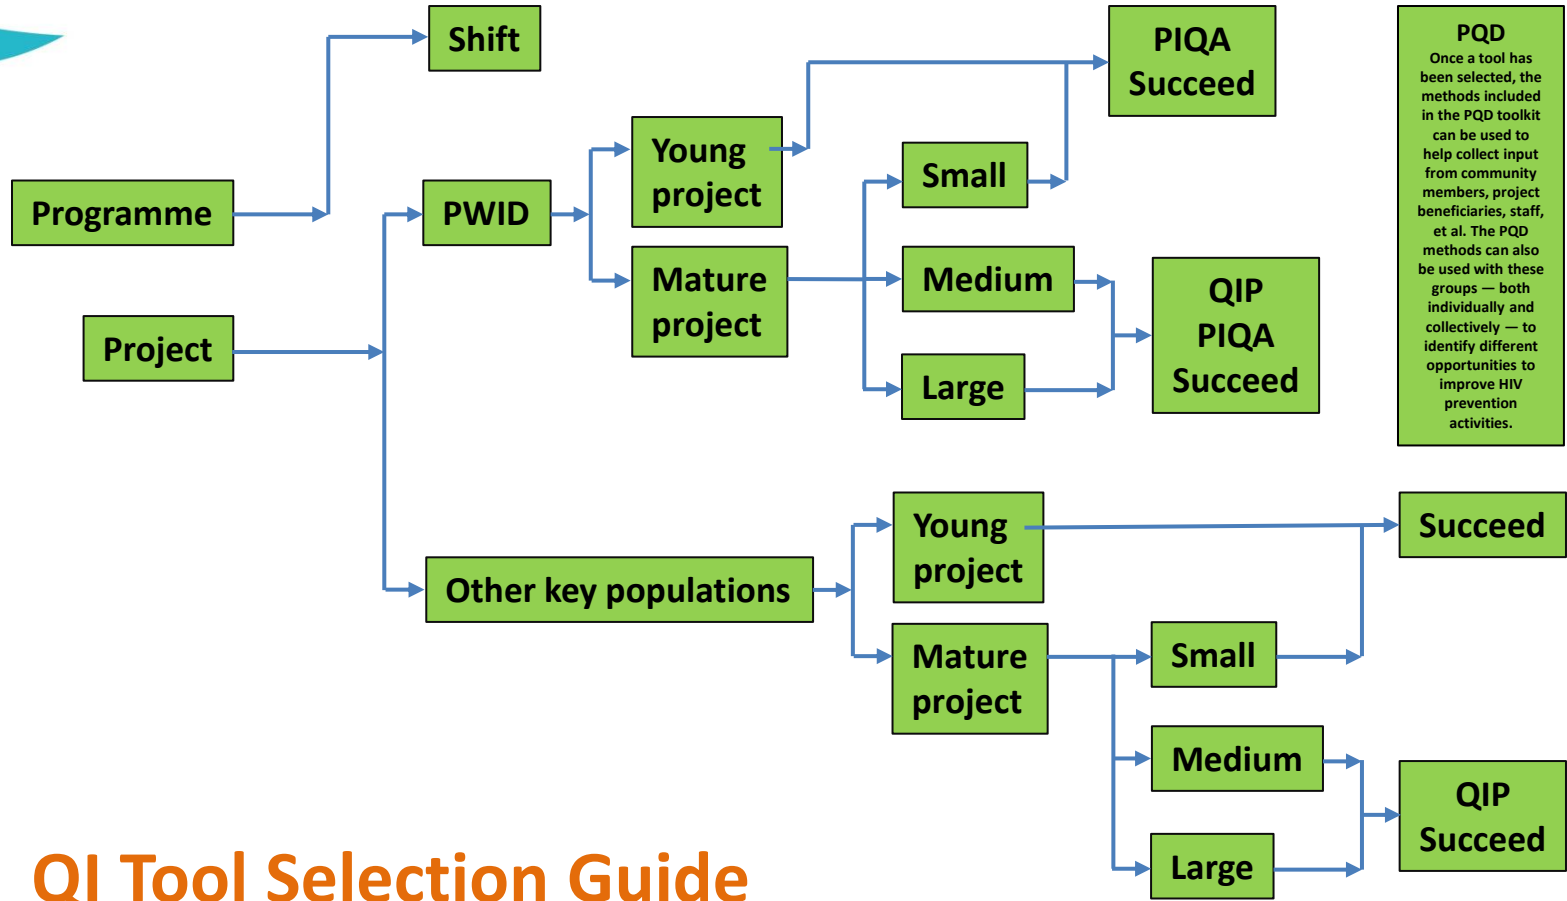

How to find the right tool

1. Go to the Tool Selection Guide
2. Use the algorithm at page 2 answering:
 - Is it a program or project ?
 - If project, key population/ target group?
 - Young or mature project?
 - Small medium or large project ?
3. The answer will lead you to a smaller selection of tools.
4. The guide will then help you compare them

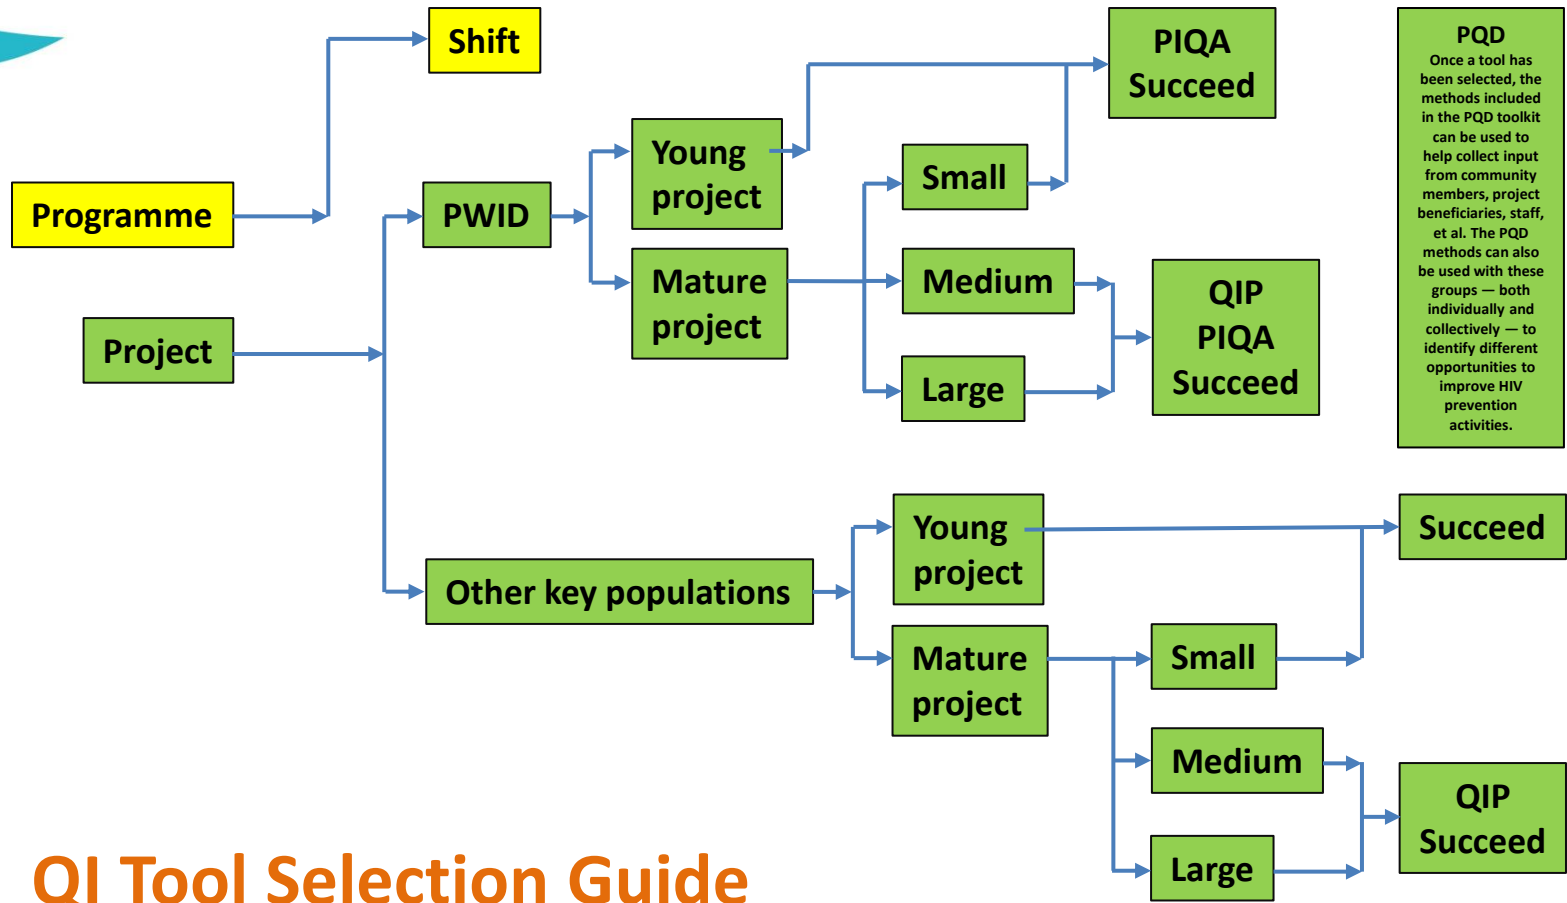

PQD
Once a tool has been selected, the methods included in the PQD toolkit can be used to help collect input from community members, project beneficiaries, staff, et al. The PQD methods can also be used with these groups – both individually and collectively – to identify different opportunities to improve HIV prevention activities.

THANK YOU, ALL!

Tool developers for Quality action:

PIQA Cor Blom and Annemiek Dorgelo

Shift Chantal Demesmaecker and David Hales

QIP Ursula von Rueden

PQD Matthias Wentzlaff

Succeed Viveca Urwitz

WP4 members:

Vasileia Konte, Greece, Miran Solinc, Slovenia

Christine Winkelmann, Germany, Laurence Mortier Luxembourg,
LennieLindberg and Frida Hansdotter, Sweden.

Other contributors to tool development:

Teymur Noori and Anastaisa Pharris ECDC

Marcia Ferri EMCDDA

Katrin Prins- Schiffer, Eberhard Schats, Correlation Network

All active participants in Quality Action and its evaluation
